

March 31, 2017

Dear Supplier,

We are excited to announce that FMC and DuPont have signed a definitive agreement that will strengthen our business and enhance our ability to serve customers around the world.

As part of this agreement, FMC will acquire a significant portion of DuPont's Crop Protection business and FMC Health and Nutrition, excluding Omega-3, will become part of DuPont's Nutrition & Health business. FMC Lithium will remain with FMC, and the company will invest significantly in the business with the intent to grow and prepare it to become an independent, publicly traded company within a few years.

We expect the transaction to close in the fourth quarter of 2017. As a valued supplier, we want you to know that we remain committed to working with you to deliver quality goods and services to our businesses as we proceed through this transaction. FMC will remain focused on our current business over the next several months.

We will continue to communicate with you as the process moves forward. Should you have any questions, please contact your FMC Procurement representative.

Thank you for your partnership with FMC.

Sincerely,

A handwritten signature in black ink, appearing to read 'K Totland', with a long horizontal flourish extending to the right.

Karen Totland
